

Invitation

Thematic workshop #Space Valorisation and adaptive reuse in the heritage city

March 3rd 4th 2021. Host city: Heraklion [online event]

Main goal of the Kairós project is to fully realize the potential of heritage valorisation as a driver for sustainable urban development and regeneration. To meet this challenge, we are experimenting with an integrated approach resulting from the assemblage of five key dimensions —Space, Economy, Social Accessibility, Attractiveness and Governance. Out of them, #Space plays a primary role, and we refer to the praxis of architecture, urban planning and urban design basically. Those practices provide the necessary physical setting for then building up the intended integrated approach.

After two successful warm-up webinars, first Kairós thematic workshop will be focused on Space. A well-structured 2 day programme, with extensive time dedicated to discussion, open to anyone interested. Cases from Ukmergė, Sibenik, Turin, Athens, Bordeaux, Mula, Skopje, Roskilde, Olot and Heraklion.
